Preventing product-contamination risks is a top priority for Fruit d'Or, every step of the way. Several preventive measures are implemented to ensure the safety of its facilities, the perfection of its processes, and the high quality of its final products. Fruit d'Or holds the Food Safety System Certification (FSSC) 22000, recognized by the GFSI for food manufacturers.

ABOUT FRUIT D'OR

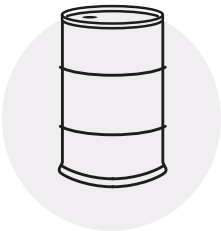

Fruit d'Or grows and processes its cranberries and wild blueberries in the northern regions of Canada. These regions are world-renowned for the quality of their crops.

- Cold climate and acidic soil for ideal berry growing
- Farmland that doesn't need fungicides
- An abundant supply of pure and fresh water
- Producers who meet the world's strictest regulations

Our different formats to meet your needs

Available on demand in aseptic packaging to minimize transport and warehousing costs.

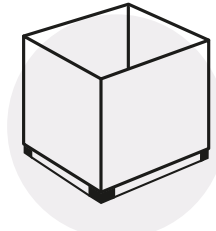

Metal drum

Concentrates: 50 US Gal, (189.27 kg - 417.27 lb) / 232.7 kg (513 lb) / 260 kg (573.2 lb)

Aseptic purees & juice: 200 kg (440.92 lb)

Tote

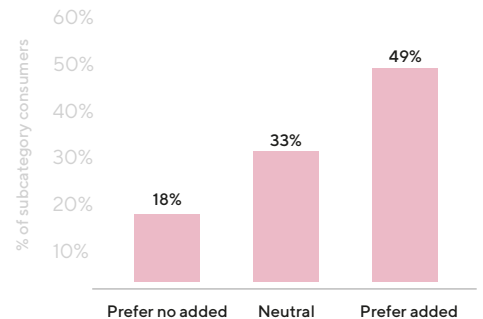

Aseptic purees: 1000 kg (2,205 lb)

According to a study, consumers showed a significant preference for juices enriched with health benefits like fiber or protein. The difference was striking, with a 31 percentage point spread between the 49% of juice, juice drink, and smoothie consumers who desired these benefits and the 18% who did not.¹

Our no added sugars and no additives products meet this demand. Additionally, our cranberry products are a good source of fiber, which can support good gut health.

Finally, our berries are grown and processed to preserve all their natural benefits. All our juices, concentrates, and purees are made from **non-genetically modified ingredients.**
